

Spelling Hide and Seek

Sometimes it helps us to spell tricky words if we spot little words hidden inside them.

This game is a fun way to train kids to do just that.

Cut the longer words into strips and hide them around your home.

Give the kids the smaller words (ideally with a clipboard) and time them as they run around finding the words and filling in the grid.

This can make a great competition with friends.

In the days that follow encourage the kids to find other examples of little words hidden within longer ones – let us know your best ones!
